Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art does not teach the use of a method for testing a pixel to determine whether it is faulty by comparing the selected pixels output to an expected value wherein the expected value is modified by the defined charge provided to the selected pixel when taken in combination with the other limitation of the independent claims. Furthermore, the prior art does not teach a fault analysis and correction block configured to pass through the digital output of an uncorrupted pixel, mask the digital output of a corrupted pixel, and mask or adjust the digital output of a partially corrupted pixel based on whether the output is saturated when taken in combination with the other limitation of the independent claims.. Furthermore, the prior art does not teach determining if the pixel is partially corrupted or completely corrupted, wherein the determination of partial or complete corruption is based at least partially on the amount of deviation between the output voltage and the defined voltage when taken in combination with the other limitation of the independent claims;

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
